## Professional Summary

---

A dedicated and driven IT Graduate with a very strong interest in technology, problem-solving and continuous learning. I work well with people and adapt quickly to different environments and situations. I take pride in my work ethic and enjoy tackling challenging tasks that require creativity and thoughtful Analysis. Eager to continuously learn and explore diverse fields, including Data Science, Cloud Computing and Software development.

---

## Core Competencies

- 
- |                                       |                               |
|---------------------------------------|-------------------------------|
| • Problem-Solving & Critical Thinking | Managing Complexity           |
| • Accountability & Planning           | Business & Financial Strategy |
| • Adaptability & Fast Learning        | Finance Fundamentals          |
- 

## Training

---

### Java Skill Development Program

*Mentored by Surprise Ramatlare*

*june-nov 2024*

- Comprehensive training in Java Fundamentals, Object-Oriented Programming (OOP) in Java, REST API development, and JDBC with MySQL.
- Hands-on experience with Git for version control and Maven as a project management and build automation tool.
- Practical application of Spring Boot for creating enterprise-level applications. Emphasis on integrating Java technologies with real-world projects using best practices in software development.

### Systems Development short Programme

*Dynamic DNA*

*Aug- Dec 2025*

- Completed training in Microsoft Azure (AZ-900 & AZ-204), gaining practical experience with cloud concepts, architecture, security, and Azure service management.
- Built and deployed cloud-based solutions using Azure Functions, Azure CLI, Azure Blob Storage, and other core Azure services within the Azure Portal.
- Collaborated in project teams to design and implement cloud-enabled applications, participating in group discussions, technical sessions, and sponsor project reviews.
- Strengthened cloud development skills through practical labs and real exercises, Showing the ability to build, manage, and troubleshoot Azure applications in a professional learning environment

---

## Education

---

|                                                                                           |      |
|-------------------------------------------------------------------------------------------|------|
| <b>Bachelors Degree in Information Technology</b><br><i>Vaal University of technology</i> | 2025 |
| <b>Diploma in Information Technology</b><br><i>Vaal University of Technology</i>          | 2024 |
| <b>Matric- Bachelors</b><br><i>Katlehong Secondary School</i>                             | 2021 |

---

## Certifications

---

- |                                   |                                  |
|-----------------------------------|----------------------------------|
| • Microsoft Azure Developer Assoc | Intro to Networks(CISCO)         |
| • Microsoft Azure Fundamentals    | Routing and switching(CISCO)     |
| • Data Analysis Essentials(IBM)   | IT Essentials:PC Hardware(Cisco) |
| • Cybersecurity Essentials(IBM)   | Office Administration(EduCourse) |
| • Data Entry(EduCourse)           | Excel(EduCourse)                 |
- 

## Technical Skills And Tools

---

- **Programming:** Java ,Python ,C#, HTML,CSS, PHP, Javascript, R
- **Tools:** MySQL , Git , VS code , NetBeans, IntelliJ, Springboot, Excel, PowerPoint, Word, PowerBI, Tableau ,pyspark
- **Cloud:** Microsoft Azure Fundamentals, Microsoft Azure Developing Solutions
